

FINGER-JOINTED
CONSTRUCTION TIMBER

FINGER-JOINTED CONSTRUCTION TIMBER

After several years of focused development, we have the experience and technical know-how required to produce finger-jointed stress graded construction timber. Our speciality is long, profiled planks up to 12.5 metres. We manufacture dimensions up to 80x220 mm. The products can be processed, for example, with precise cutting, drilling, and pressure-treatment. Production takes place under the supervision of SP. We are certified in accordance with Swedish standard C18-C24 and German standard S10.
